*An authorization (otherwise known as “discretionary spending”) explicitly allows funding for a certain program and / or directs a federal agency to take a certain action. Authorizations express the House's *intent* to spend, however, actual funding is provided through the annual appropriations process. **Authorizations with no net cost, bills that would result in no significant net change in mandatory spending or federal revenue, and private-sector costs from federal mandates are not reported here.**

Mandatory spending directly establishes an appropriation. No subsequent action is required for the money to be spent.

All numbers are positive unless otherwise indicated.

[#] A “major” bill is defined here as a bill for which the authorization, mandatory spending, **or** revenue score is at least \$1.0 billion (either positive or negative) over five years.
